

BREAK INTO AEROSPACE

Aerospace Component Suppliers

Comprehensive Industrial Directory

Targeted for the 2025–2026 Reference Cycle

What This Document Covers: This global directory serves as a comprehensive reference of aerospace component suppliers. It indexes major tier-one and tier-two industrial providers specializing in aerostructures, advanced avionics, flight controls, landing gear, jet propulsion systems, power distribution units, and internal cabin systems. The corporate entities listed herein represent the baseline supply chain matrix spanning commercial, civil, general, military, and space flight sectors.

COMPONENT SUPPLIERS DIRECTORY

Spirit AeroSystems: One of the largest suppliers of commercial airplane assemblies and components.

USA

Activities: Fuselage Systems, Wing Systems

Types: Commercial Aircraft

Honeywell Aerospace: Supplies avionics, engines, and other flight safety products to both civilian and military sectors.

USA

Activities: Avionics, Engine Controls, Environmental Controls

Types: Commercial Aircraft, Military Aircraft

UTC Aerospace Systems: Merged with Rockwell Collins to form Collins Aerospace, a leader in technologically advanced aerospace systems.

USA

Activities: Landing Gear, Actuation Systems, Sensors

Types: Commercial Aircraft, Military Aircraft

Safran Aircraft Engines: Designs and produces engines for a wide range of aircraft.

France

Activities: Aircraft Engines, Power Systems

Types: Commercial Aircraft, Military Aircraft

Raytheon Technologies: Provides a broad range of high technology products and services for the aerospace and defense industry.

USA

Activities: Avionics, Electrical Systems, Mission Systems

Types: Commercial Aircraft, Military Aircraft

UK

Rolls-Royce Holdings: Specializes in the development, manufacture, and support of power systems for the aerospace sector.

Activities: Jet Engines, Turbine Blades

Types: Commercial Aircraft, Military Aircraft

USA

GE Aviation: A leading provider of jet and turboprop engines, components, and integrated systems for aircraft.

Activities: Engines, Electrical Power Systems

Types: Commercial Aircraft, Military Aircraft

USA

Triumph Group: Designs, engineers, manufactures, repairs, and overhauls a wide range of aircraft components.

Activities: Aerostructures, Mechanical Systems

Types: Commercial Aircraft, Military Aircraft

USA

Moog Inc.: Supplies flight control systems and components for civil and military aircraft.

Activities: Flight Control Systems, Actuation Systems

Types: Commercial Aircraft, Military Aircraft

UK

Meggitt PLC: Specializes in high performance components and subsystems for the aerospace, defense, and energy markets.

Activities: Braking Systems, Polymers & Composites

Types: Commercial Aircraft, Military Aircraft

UK

Cobham plc: Provides technology and services in avionics, air refueling, and life support systems.

Activities: Avionics, Air Refueling Systems, Life Support Systems

Types: Commercial Aircraft, Military Aircraft

UK

BAE Systems plc: Provides some of the world's most advanced, technology-led defense, aerospace, and security solutions.

Activities: Electronic Warfare Systems, Flight Controls

Types: Commercial Aircraft, Military Aircraft

France

Zodiac Aerospace: A subsidiary of Safran, specializing in aerospace equipment and systems for commercial aircraft.

Activities: Cabin Interiors, Emergency Systems

Types: Commercial Aircraft

Diehl Aerospace: A joint venture between Thales and Diehl Group, supplies avionics and cabin lighting. Germany

Activities: Avionics, Cabin Lighting Systems

Types: Commercial Aircraft

MTU Aero Engines: Develops, manufactures, and provides service support for aircraft engines. Germany

Activities: Aircraft Engines, Engine Components

Types: Commercial Aircraft, Military Aircraft

Thales Group: Provides various aerospace services including avionics and mission systems. France

Activities: Avionics, In-flight Entertainment Systems

Types: Commercial Aircraft, Military Aircraft

Alcoa Corporation: A global leader in bauxite, alumina, and aluminum products, crucial for aircraft manufacturing. USA

Activities: Aluminum Products, Structural Components

Types: Commercial Aircraft, Military Aircraft

Curtiss-Wright Corporation: Provides highly engineered, critical function products and services to the aerospace industry. USA

Activities: Actuation Systems, Controls

Types: Commercial Aircraft, Military Aircraft

Eaton Corporation: Specializes in energy-efficient solutions that help manage electrical, hydraulic, and mechanical power... USA

Activities: Hydraulic Systems, Fuel Systems

Types: Commercial Aircraft, Military Aircraft

Parker Hannifin Corporation: Supplies aerospace systems and components such as hydraulic, fuel, flight control, and pneumatic systems. USA

Activities: Hydraulic Systems, Flight Control Systems

Types: Commercial Aircraft, Military Aircraft

Goodrich Corporation: Goodrich Corporation, acquired by UTC, was a leading global supplier of systems and services to the aerospace and defense industry. USA

Activities: Landing Gear, Engine Control Systems

Types: Commercial Aircraft, Military Aircraft

Teledyne Technologies: Teledyne is known for its electronic and communication components for aerospace applications.

Activities: Avionics, Communication Systems

Types: Commercial Aircraft, Military Aircraft

USA

Woodward, Inc.: Specializes in control solutions for aerospace and industrial use, including components for turbine engines.

Activities: Control Systems, Fuel Injection Systems

Types: Commercial Aircraft, Military Aircraft

USA

Smiths Group: Smiths Group is a technology company offering products and services for the global aerospace market...

Activities: Mechanical Systems, Avionics

Types: Commercial Aircraft, Military Aircraft

UK

TransDigm Group: Designs and manufactures highly engineered aerospace components, often under sole-source contracts.

Activities: Mechanical Components, Actuation Systems

Types: Commercial Aircraft, Military Aircraft

USA

Aernnova Aerospace: An engineering company providing design and manufacturing services for aerostructures...

Activities: Aerostructures, Engineering Services

Types: Commercial Aircraft

Spain

Hexcel Corporation: Supplies composite materials for aerospace and other industries, vital for modern aircraft manufacturing.

Activities: Composite Materials, Structural Components

Types: Commercial Aircraft, Military Aircraft

USA

Liebherr-Aerospace: Provides systems for the aviation industry, including landing gear, air management, and flight control systems.

Activities: Landing Gear, Flight Control Systems

Types: Commercial Aircraft, Military Aircraft

Germany, France

Latecoere: A French firm specializing in aerostructures and interconnection systems, providing doors and cable harnesses for aircraft.

Activities: Aerostructures, Interconnection Systems

Types: Commercial Aircraft

France

Austria

FACC AG: An Austrian company focusing on design and manufacture of composite components and systems...

Activities: Composite Aerostructures, Engine Components

Types: Commercial Aircraft

UK

Senior plc: Designs, manufactures, and markets high-technology components and systems...

Activities: Aerostructures, Fluid Conveyance Systems

Types: Commercial Aircraft, Military Aircraft

UK

Ultra Electronics: Provides application-engineered bespoke solutions for the aerospace, defense, security, transport and energy markets.

Activities: Avionics, Electronic Systems

Types: Commercial Aircraft, Military Aircraft

USA

Kaman Aerospace: Produces aerospace parts including bearings, gears, and complex assemblies...

Activities: Aerostructures, Specialty Bearings

Types: Commercial Aircraft, Military Aircraft

UK

Bodycote: The world's largest provider of heat treatments and specialist thermal processing services...

Activities: Thermal Processing, Coating Services

Types: Commercial Aircraft, Military Aircraft

USA

Amphenol Corporation: One of the largest manufacturers of interconnect products, providing electrical, electronic and fiber optic connectors...

Activities: Electrical Systems, Interconnect Products

Types: Commercial Aircraft, Military Aircraft

France

Stelia Aerospace: A subsidiary of Airbus, specializing in aerostructures, pilot seats and first class and business class passenger seats.

Activities: Aerostructures, Cabin Interiors

Types: Commercial Aircraft

France

Lisi Aerospace: Produces fasteners and structural components used in the assembly of aircraft and engine components.

Activities: Fasteners, Structural Components

Types: Commercial Aircraft, Military Aircraft

Trelleborg AB: Specializes in polymer technology, Trelleborg provides various engineered solutions that seal, damp and protect critical applications...

Activities: Sealing Solutions, Vibration Dampeners

Types: Commercial Aircraft, Military Aircraft

Sweden

Barnes Group: An international aerospace and industrial manufacturer and service provider...

Activities: Precision Components, MRO Services

Types: Commercial Aircraft, Military Aircraft

USA

Bharat Electronics Limited (BEL): A leading Indian state-owned aerospace and defense company providing advanced electronic products...

Activities: Avionics, Radar Systems, Electronic Warfare

Types: Commercial Aircraft, Military Aircraft

India

Dynamatic Technologies: A major Indian player known for manufacturing aerostructures and high precision components.

Activities: Aerostructures, Precision Assemblies

Types: Commercial Aircraft, Military Aircraft

India

Reliance Defence and Engineering: Part of Reliance Group, focused on maritime and aerospace engineering, including manufacturing components for aircraft.

Activities: Aerostructures, Components Manufacturing

Types: Commercial Aircraft, Military Aircraft

India

Samtel Avionics: A leading Indian firm in avionics and military electronics, manufacturing displays and systems for aircraft.

Activities: Avionics, Display Systems

Types: Military Aircraft

India

COMAC (Commercial Aircraft Corporation of China): A major state-owned airplane maker in China developing components and aircraft like the C919.

Activities: Airframe Components, Whole Aircraft

Types: Commercial Aircraft

China

Tata Advanced Materials Limited: A subsidiary of Tata, specializing in composite materials and aerospace components in India.

Activities: Composite Materials, Aerostructures

Types: Commercial Aircraft, Military Aircraft

India

India

Godrej Aerospace: Produces precision components and assemblies for the aerospace sector, part of the Godrej Group.

Activities: Engines, Aerostructures

Types: Commercial Aircraft, Military Aircraft

India

Rossell Techsys: Indian company specializing in aerospace electronics and electrical systems for global aerospace leaders.

Activities: Electrical Systems, Wiring Harnesses

Types: Commercial Aircraft, Military Aircraft

India

Larsen & Toubro Aerospace: Part of the L&T conglomerate, this company manufactures critical aerospace components and systems.

Activities: Aerostructures, Engine Components

Types: Commercial Aircraft, Military Aircraft

India

Kalyani Strategic Systems: An Indian company focusing on high-precision components and assemblies for aerospace applications.

Activities: Precision Assemblies, Engine Components

Types: Commercial Aircraft, Military Aircraft

USA

L3Harris Technologies: Specializes in defense and commercial technology, including surveillance solutions, avionics, and electronic systems.

Activities: Avionics, Electronic Systems, Surveillance Equipment

Types: Commercial Aircraft, Military Aircraft

USA

Aerojet Rocketdyne: Provides propulsion and power systems for space, defense, and aviation industries.

Activities: Propulsion Systems, Engine Components

Types: Military Aircraft

USA

Crane Aerospace & Electronics: Supplies critical systems and components for the aerospace and electronics sectors.

Activities: Fluid Management, Landing Gear Systems, Electronic Components

Types: Commercial Aircraft, Military Aircraft

USA

Alliant Techsystems (ATK): Before merging with Orbital, ATK was known for aerospace, defense, and commercial products including composite structures.

Activities: Composite Structures, Propulsion Systems

Types: Military Aircraft, Spacecraft

Vought Aircraft Industries: Known for manufacturing large airframe structures; now part of Triumph Aerospace Structures.

Activities: Aerostructures, Assemblies

Types: Commercial Aircraft

USA

Sierra Nevada Corporation: Focuses on the development of innovative high-technology electronics, hardware, and integrated systems for aerospace.

Activities: Avionics, Space Systems, Propulsion Systems

Types: Commercial Aircraft

USA

Moeller Aerospace: Specializes in precision manufacturing of turbine blades and vanes for the aerospace industry.

Activities: Turbine Components, Engine Parts

Types: Commercial Aircraft, Military Aircraft

USA

CPI Aero: Manufactures structural assemblies, such as wing assemblies, engine mounts, and fuel panel systems.

Activities: Aerostructures, Engine Mounts, Fuel Panel Systems

Types: Commercial Aircraft, Military Aircraft

USA

Ducommun Incorporated: Provides engineering and manufacturing services for aeronautical products, including structural and electronic components.

Activities: Aerostructures, Electronic Systems

Types: Commercial Aircraft, Military Aircraft

USA

Heico Corporation: Designs and manufactures FAA-approved aircraft parts and repair services for civil and military aviation.

Activities: Replacement Parts, Repair Services

Types: Commercial Aircraft, Military Aircraft

USA

Exotic Metals Forming Company LLC: Specializes in the design and manufacture of advanced metal components and assemblies for the aerospace industry.

Activities: Metal Components, Assemblies

Types: Commercial Aircraft, Military Aircraft

USA

Skurka Aerospace: Designs and manufactures electric motors, generators, and other complex electronic components for aerospace applications.

Activities: Electric Motors, Generators

Types: Commercial Aircraft, Military Aircraft

USA

Collins Aerospace: Formed from the merger of UTC Aerospace Systems and Rockwell Collins, it's a leader in technologically advanced and intelligent solutions.

Activities: Avionics, Cabin Systems, Landing Systems

Types: Commercial Aircraft, Military Aircraft

USA

Arconic: Spun off from Alcoa, specializes in lightweight metals engineering and manufacturing.

Activities: Structural Components, Engine Products

Types: Commercial Aircraft, Military Aircraft

USA

Astronics Corporation: Provides advanced, high-performance lighting and electronic products for the global aerospace and defense industries.

Activities: Lighting Systems, Electronic Components

Types: Commercial Aircraft, Military Aircraft

USA

MBDA: A leader in the development and production of missiles and missile systems for the global defense sector.

Activities: Missile Systems, Electronic Warfare Components

Types: Military Aircraft, Unmanned Aerial Vehicles

France, UK, Italy, Germany

RUAG Group: Focuses on aerospace technology, providing products and services including aircraft structures and avionic systems.

Activities: Aerostructures, Avionics

Types: Commercial Aircraft, Military Aircraft

Switzerland

SAAB Group: Known for its high-tech defense and security solutions including radar and electronic warfare systems.

Activities: Avionics, Electronic Warfare Systems

Types: Military Aircraft

Sweden

Leonardo S.p.A.: A global high-tech player in aerospace, defense, and security, offering a wide range of systems and components for aircraft.

Activities: Avionics, Electronic Systems, Aerostructures

Types: Commercial Aircraft, Military Aircraft

Italy

MT Aerospace: A subsidiary of OHB SE, specializing in aerospace structures and tanks for aircraft and space applications.

Activities: Aerostructures, Space Components

Types: Commercial Aircraft

Germany

QinetiQ: Provides technological and scientific expertise in the development of advanced aerospace systems and solutions.

Activities: Avionics, Surveillance Systems

Types: Military Aircraft

UK

Marshall Aerospace and Defence Group: Specializes in the design and manufacture of aerostructures and systems, along with maintenance and conversion services.

Activities: Aerostructures, Maintenance Services

Types: Commercial Aircraft, Military Aircraft

UK

Recaro Aircraft Seating: Renowned for designing, developing, and manufacturing aircraft seats for major airlines worldwide.

Activities: Cabin Interiors, Aircraft Seating

Types: Commercial Aircraft

Germany

Fokker Technologies: Part of GKN Aerospace, Fokker is known for producing aerostructures, electrical wiring systems, and landing gear.

Activities: Aerostructures, Electrical Systems

Types: Commercial Aircraft

Netherlands

Oerlikon Balzers: Focuses on advanced coatings that enhance the durability and performance of components in harsh environments.

Activities: Surface Engineering, Coating Solutions

Types: Commercial Aircraft, Military Aircraft

Liechtenstein

Safran Landing Systems: The world leader in aircraft landing and braking systems.

Activities: Landing Gear, Braking Systems

Types: Commercial Aircraft, Military Aircraft

France

Nordam Europe Limited: Specializes in the repair and maintenance of aircraft components such as nacelles, thrust reversers, and interior panels.

Activities: Maintenance Services, Component Repair

Types: Commercial Aircraft

UK

Asco Industries: Designs and manufactures major functional components such as wing components and landing gear parts.

Activities: Aerostructures, Landing Gear Components

Types: Commercial Aircraft

Belgium

France

Daher Aerospace: Known for its integrated industrial systems and aerospace products, including aircraft manufacturing and aerostructures.

Activities: Aerostructures, Logistics and Supply Chain Management

Types: Commercial Aircraft

Spain

ACITURRI Aeronáutica: Specializes in the manufacture of aerostructures and engine components, supporting major European aerospace programs.

Activities: Aerostructures, Engine Components

Types: Commercial Aircraft

Czech Republic

Aero Vodochody Aerospace: Focuses on the production and maintenance of military and civilian aircraft, including aerostructures and assemblies.

Activities: Aerostructures, Assemblies

Types: Military Aircraft, General Aviation

USA

Garmin Ltd.: Known for GPS technology, Garmin extends its expertise to avionics with integrated flight decks and navigation systems.

Activities: Avionics, GPS Navigation Systems

Types: General Aviation, Commercial Aircraft

USA

GE Aviation Systems: A division of General Electric, provides integrated digital, electrical power, and mechanical systems for aircraft.

Activities: Engine Systems, Electrical Power Systems, Digital Solutions

Types: Commercial Aircraft, Military Aircraft

USA

BendixKing: A subsidiary of Honeywell, offers avionics systems including autopilots, communications equipment, and navigation systems.

Activities: Avionics, Communication Systems, Navigation Systems

Types: General Aviation

USA

Universal Avionics Systems Corporation: Designs and manufactures advanced avionics systems for various types of aircraft, focusing on cockpit solutions.

Activities: Flight Management Systems, Avionics

Types: Commercial Aircraft, Military Aircraft

USA

Avidyne Corporation: Specializes in the design and manufacture of integrated avionics systems, including flight displays and flight management systems.

Activities: Integrated Avionics, Flight Management Systems

Types: General Aviation, Commercial Aircraft

USA

Aspen Avionics: Provides highly reliable glass cockpit solutions designed to enhance the capabilities of flight instruments.

Activities: Electronic Flight Instrument Systems

Types: General Aviation

USA

Astronautics Corporation of America: Develops advanced avionics equipment and systems, including electronic flight bags and network server systems.

Activities: Avionics, Navigation Systems, Electronic Flight Bags

Types: Commercial Aircraft, Military Aircraft

USA

ViaSat Inc.: Provides satellite and wireless communications systems including high-speed internet for aircraft.

Activities: Communication Systems, Satellite Internet

Types: Commercial Aircraft, Military Aircraft

USA

Elbit Systems of America: Offers a range of defense, aerospace, and medical applications, including cockpit systems and helmet-mounted displays.

Activities: Avionics, Cockpit Systems, Helmet-mounted Displays

Types: Military Aircraft

USA

Panasonic Avionics Corporation: Specializes in in-flight entertainment and communications (IFEC) systems for commercial airlines.

Activities: In-flight Entertainment Systems, Communication Systems

Types: Commercial Aircraft

USA

Teledyne Controls: Provides aircraft data management and wireless data acquisition solutions to optimize performance.

Activities: Data Management Systems, Wireless Data Acquisition Systems

Types: Commercial Aircraft

USA

Blue Sky Network: Offers satellite communication solutions and fleet management systems for aviation applications.

Activities: Satellite Communication Systems, Fleet Management Software

Types: General Aviation, Commercial Aircraft

USA

ForeFlight: A Boeing company that creates flight planning and navigation software primarily for iPads and other mobile devices.

Activities: Flight Planning Software, Navigation Apps

Types: General Aviation

USA

Dynon Avionics: Produces avionics for small and experimental aircraft, including flight displays and navigation aids.

Activities: Avionics, Flight Displays, Navigation Systems

Types: General Aviation

France

Safran Electronics & Defense: Specializes in optronics, avionics, electronics, and critical software for both civil and military markets.

Activities: Avionics, Flight Control Systems, Engine Electronics

Types: Commercial Aircraft, Military Aircraft

Spain

Indra Sistemas: A Spanish information technology and defense systems company that provides advanced avionics and simulation technology.

Activities: Avionics, Radar Systems, Simulation Systems

Types: Commercial Aircraft, Military Aircraft

UK

Astronics AES: Part of the Astronics group, specializes in advanced electrical power generation and distribution systems.

Activities: Electrical Power Systems, Cabin Electronics

Types: Commercial Aircraft

Switzerland

SITAONAIR: Provides airline communications and connectivity solutions, helping to transform cockpit communications.

Activities: Air-to-Ground Communication, In-flight Connectivity

Types: Commercial Aircraft

Norway

AIM Norway AS: Services and maintains components for F-16 fighter jets and NH90 helicopters, covering electronic systems and more.

Activities: Avionics Maintenance, Electronic Systems

Types: Military Aircraft

Italy

Elettronica S.p.A.: Delivers state-of-the-art electronic warfare systems and solutions, including avionics for defense applications.

Activities: Electronic Warfare Systems, Avionics

Types: Military Aircraft

Germany

Nord Micro: A German company part of Collins Aerospace, specializing in cabin pressure and air management systems for commercial aircraft.

Activities: Cabin Pressure Systems, Air Management Systems

Types: Commercial Aircraft

SELEX ES: Now part of Leonardo, was known for providing a comprehensive range of electronic and information systems for aviation.

Activities: Radar Systems, Avionics

Types: Commercial Aircraft, Military Aircraft

Italy

NavAero: Develops rugged electronic flight bag (EFB) systems designed specifically for the cockpit environment.

Activities: Electronic Flight Bags, Avionics

Types: Commercial Aircraft

Sweden

ATEC: Produces and supports test solutions for avionics components and systems.

Activities: Avionics Testing Systems, Support Systems

Types: Commercial Aircraft, Military Aircraft

Czech Republic

GTD Group: Provides engineering and system integration services including software solutions for flight and mission control.

Activities: Avionics Software, Control Systems Integration

Types: Commercial Aircraft, Military Aircraft

Spain

Mitsubishi Electric: Provides electronic and electrical systems for aircraft, including satellite communication and navigation systems.

Activities: Avionics, Communication Systems

Types: Commercial Aircraft

Japan

Elbit Systems Ltd.: Israeli defense electronics company that manufactures systems covering a wide range of aerospace applications.

Activities: Avionics, Flight Control Systems, Electronic Warfare

Types: Commercial Aircraft, Military Aircraft

Israel

Korean Aerospace Industries: South Korea's major aerospace manufacturer, specializing in avionics and airframe components.

Activities: Avionics, Airframe Components

Types: Commercial Aircraft, Military Aircraft

South Korea

AVIC (Aviation Industry Corporation of China): Chinese state-owned aerospace and defense company, providing comprehensive avionics systems.

Activities: Avionics, Radar Systems

Types: Commercial Aircraft, Military Aircraft

China

Turkish Aerospace Industries: Develops and manufactures advanced avionics and aerostructures for aircraft.

Activities: Avionics, Aerostructures

Types: Military Aircraft

Turkey

Israel Aerospace Industries: Provides a wide range of defense and aerospace technologies including advanced avionics systems.

Activities: Avionics, Radar Systems

Types: Commercial Aircraft, Military Aircraft

Israel

AeroVironment: American company that designs and produces unmanned aircraft systems and electric transportation solutions.

Activities: Avionics, UAV Systems

Types: Unmanned Aerial Vehicles

USA

Transas: Specializes in aviation simulation technology, including flight simulators and training systems.

Activities: Simulation Systems, Training Technology

Types: Commercial Aircraft

Ireland

CASIC (China Aerospace Science and Industry Corporation): Focuses on the research, development, and manufacture of aerospace systems and components.

Activities: Avionics, Missile Systems

Types: Military Aircraft, Missiles

China

Denel Dynamics: South African state-owned aerospace and defense technology company specializing in missile and defense systems.

Activities: Avionics, Missile Systems

Types: Military Aircraft

South Africa

Atech Negocios em Tecnologias S.A.: Brazilian company specializing in systems integration and development of complex mission-critical systems, including avionics.

Activities: Systems Integration, Avionics

Types: Commercial Aircraft, Military Aircraft

Brazil

RADA Electronic Industries Ltd.: Israeli company specializing in defense electronics, providing advanced tactical radar systems for aircraft.

Activities: Avionics, Radar Systems

Types: Military Aircraft

Israel

Canada

Field Aviation: Canadian leader in aerospace engineering, manufacturing, and aircraft modifications, focusing on special mission systems.

Activities: Avionics, Airframe Modifications

Types: Special Mission Aircraft

United Arab Emirates

Atlas Aerospace: UAE-based aerospace company that provides aviation technology solutions including integrated avionics systems.

Activities: Avionics, Flight Control Systems

Types: Commercial Aircraft, Military Aircraft

USA

Pratt & Whitney: A major American aerospace manufacturer with global service operations, known for its wide range of jet engines.

Activities: Engine Manufacturing, Service Solutions

Types: Commercial Aircraft, Military Aircraft

USA, France

CFM International: A joint venture between GE Aviation and Safran Aircraft Engines, specializing in producing engines for commercial aircraft.

Activities: Engine Manufacturing

Types: Commercial Aircraft

Multinational

IAE International Aero Engines AG: A multinational aero engine consortium that partners to produce the V2500 engines for commercial jets.

Activities: Engine Manufacturing, Service Solutions

Types: Commercial Aircraft

USA

Williams International: Specializes in small, powerful engines for various aircraft, including personal jets and unmanned aerial vehicles.

Activities: Engine Manufacturing, Service Solutions

Types: General Aviation, Unmanned Aerial Vehicles

USA

Engine Alliance: A joint venture between General Electric and Pratt & Whitney, created to develop engines for large commercial aircraft.

Activities: Engine Manufacturing

Types: Commercial Aircraft

USA

Lycoming Engines: An American aviation engine manufacturer that specializes in piston engines for general aviation aircraft.

Activities: Engine Manufacturing

Types: General Aviation

Continental Aerospace Technologies: Known for its range of light aircraft engines including piston and turboprop engines.

Activities: Engine Manufacturing, Maintenance Services

Types: General Aviation

USA

United Engine Corporation: A Russian conglomerate that produces engines for military and civil aviation applications.

Activities: Engine Manufacturing, Service Solutions

Types: Commercial Aircraft, Military Aircraft

Russia

Turbomeca (Safran Helicopter Engines): Specializes in manufacturing helicopter engines and offers a wide range of services related to rotary-wing engines.

Activities: Engine Manufacturing, Maintenance Services

Types: Helicopters

France

Avio Aero: A GE Aviation business that designs, manufactures and maintains components and systems for civil and military aviation.

Activities: Engine Components, Maintenance Services

Types: Commercial Aircraft, Military Aircraft

Italy

Bharat Forge: An Indian multinational company that manufactures various components including aerospace engines and parts.

Activities: Engine Components, Aerospace Manufacturing

Types: Commercial Aircraft, Military Aircraft

India

Mitsubishi Heavy Industries: Part of the Mitsubishi Group, which produces aerospace systems, including aircraft engines and components.

Activities: Engine Manufacturing, Aerospace Systems

Types: Commercial Aircraft, Military Aircraft

Japan

Klimov Company: Specializes in the design and manufacture of engines for military aircraft, including helicopters and fighter jets.

Activities: Engine Manufacturing

Types: Military Aircraft, Helicopters

Russia

PowerJet: A joint venture between Safran Aircraft Engines and NPO Saturn, focuses on the SaM146 engine for regional jets.

Activities: Engine Manufacturing

Types: General Aviation

France, Russia

China

Aero Engine Corporation of China (AECC): State-owned corporation in China dedicated to the design and manufacture of aircraft engines and related technology.

Activities: Engine Manufacturing, R&D

Types: Commercial Aircraft, Military Aircraft

USA

UTC Aerospace Systems (Collins Aerospace): A major provider of technologically advanced aerospace systems, including landing gear systems for both commercial and military aircraft.

Activities: Landing Gear Manufacturing, Systems Integration

Types: Commercial Aircraft, Military Aircraft

Canada

Héroux-Devtek: Specializes in the design, development, manufacture, and repair of landing gear systems.

Activities: Landing Gear Manufacturing, MRO Services

Types: Commercial Aircraft, Military Aircraft

Canada

Magellan Aerospace: Provides complex assemblies for spacecraft, aircraft engines, and aerostructures, including precision landing gear components.

Activities: Landing Gear Components, Aerostructures

Types: Commercial Aircraft

Italy

Mecaer Aviation Group: Known for its integrated landing systems, including design, manufacture, and support of landing gear.

Activities: Landing Gear Manufacturing, Systems Design

Types: Helicopters, General Aviation

USA

AAR Corp: Supplies a broad range of products and services to the aerospace and defense industry, including landing gear maintenance and overhaul.

Activities: Landing Gear MRO Services

Types: Commercial Aircraft, Military Aircraft

USA

CIRCOR Aerospace: Specializes in fluid control and landing gear systems for aerospace and defense applications.

Activities: Landing Gear Systems, Fluid Control Systems

Types: Commercial Aircraft, Military Aircraft

USA

Menasco Aerospace Ltd.: Provides landing gear systems and components, known for high-quality manufacturing and maintenance services.

Activities: Landing Gear Manufacturing, MRO Services

Types: Commercial Aircraft, Military Aircraft

USA

Beaver Aerospace & Defense: Designs and manufactures ball screws and actuators for aircraft landing gear and other aerospace applications.

Activities: Landing Gear Components, Actuation Systems

Types: Commercial Aircraft, Military Aircraft

Canada

SPP Canada Aircraft, Inc.: Specializes in the manufacture and assembly of high precision landing gear components.

Activities: Landing Gear Components, Assembly Services

Types: Commercial Aircraft

UK

APPH: Part of the BBA Aviation group, designs and manufactures hydraulic systems and landing gears for aerospace applications.

Activities: Landing Gear Systems, Hydraulic Systems

Types: Commercial Aircraft, Military Aircraft

South Korea

ACE Aerospace: Focuses on the production of landing gear and related components for a range of aircraft types.

Activities: Landing Gear Manufacturing

Types: Commercial Aircraft, Military Aircraft

USA

Parker Aerospace: Provides advanced aerospace systems and components, including hydraulic systems for landing gears.

Activities: Hydraulic Systems for Landing Gears

Types: Commercial Aircraft, Military Aircraft

Taiwan

Aerospace Industrial Development Corporation: Engages in the manufacture of aerospace components, including landing gear for military and commercial aircraft.

Activities: Landing Gear Manufacturing

Types: Commercial Aircraft, Military Aircraft

Germany

Hydro Systems KG: Known for its maintenance tools and ground support equipment for aircraft, including landing gear systems.

Activities: Ground Support Equipment, Landing Gear Tools

Types: Commercial Aircraft, Military Aircraft

SUMMARY REFERENCE TABLE

#	Supplier Profile	Primary Domicile
1	Spirit AeroSystems — Tier-1 Fuselage & Wing Structures	USA
2	Honeywell Aerospace — Flight Safety, Avionics & Propulsion Controls	USA
3	UTC Aerospace Systems — Integrated Actuation & Landing Systems	USA
4	Safran Aircraft Engines — Narrowbody Commercial Propulsion	France
5	Raytheon Technologies — Broad Spectrum Aviation Hardware Systems	USA
6	Rolls-Royce Holdings — Multi-Engine Turbofan Power Systems	UK
7	GE Aviation — Global Commercial & Defense Turbofans	USA
8	Triumph Group — Complex Aerostructures & Mechanical Integration	USA
9	Moog Inc. — Precision Flight Control & Actuation Modules	USA
10	Meggitt PLC — Extreme Environment Braking & Composite Subsystems	UK
11	Cobham plc — Specialized Aerial Refueling & Avionics Hardware	UK
12	BAE Systems plc — Integrated Electronic Warfare & Active Controls	UK
13	Zodiac Aerospace — Premium Cabin Interiors & Safety Outfits	France
14	Diehl Aerospace — Automated Cabin Lighting & Core Avionics Systems	Germany
15	MTU Aero Engines — Multi-Platform Turbofan Cores & Support Services	Germany
16	Thales Group — Civil & Tactical Flight Management Systems	France
17	Alcoa Corporation — Primary Metallurgical Aerostructures	USA
18	Curtiss-Wright Corporation — High-Reliability Control & Actuation Units	USA
19	Eaton Corporation — Integrated Fuel & Power Hydraulics	USA
20	Parker Hannifin Corporation — Sub-System Hydraulic & Fluid Conveyance	USA
21	Goodrich Corporation — Precision Landing Gears & Engine Controls	USA
22	Teledyne Technologies — Tactical Data Acquisition & Flight Electronics	USA
23	Woodward, Inc. — Turbine Control Units	USA
24	Smiths Group — Advanced Mechanical Systems & Instrument Infrastructure	UK
25	TransDigm Group — Proprietary Sole-Source Mechanical Components	USA
26	Aernnova Aerospace — Engineering Design & Structural Assemblies	Spain
27	Hexcel Corporation — Structural Advanced Composites & Honeycomb Cores	USA
28	Liebherr-Aerospace — Integrated Environmental & Landing Gear Circuits	Germany, France
29	Latecoere — Passenger Doors & High-Capacity Wiring Harnesses	France
30	FACC AG — Advanced Composite Exterior Interiors	Austria
31	Senior plc — Fluid Conveyance Circuits & Structured Elements	UK
32	Ultra Electronics — Bespoke Tactical Subsystems & Avionics Arrays	UK
33	Kaman Aerospace — Specialty Bearings & Structural Sub-Assemblies	USA
34	Bodycote — High-Capacity Precision Thermal Metallurgical Processing	UK
35	Amphenol Corporation — Electrical & Optical Interconnect Couplings	USA
36	Stelia Aerospace — Premium Seating & Structural Airframe Blocks	France
37	Lisi Aerospace — High-Stress Assembly Fasteners	France

THE STRUCTURAL REALITY OF TIERED AEROSPACE COMPONENT SUPPLY

The global aerospace component supply chain represents one of the most highly regulated, technologically specialized, and quality-vetted industrial networks in the world. Original Equipment Manufacturers (OEMs) rely on this international grid of Tier-1 and Tier-2 suppliers to design and manufacture components that must satisfy stringent airworthiness directives.

From high-power Silicon Carbide (SiC) power distribution electronics and multi-grid ion thruster optics to heavy hydraulic landing gear shock struts and 3D woven resin-transfer-moulded composite turbofan blades, the business of aerospace component supply is bounded by absolute traceability. Every connection, casting, or line code is subject to environmental qualification envelopes (e.g., DO-160 standards) ensuring functionality from ground level to high-altitude low-pressure environments.
